

HELP! I see a search box.

If you see a search box instead of , then click the search box

Search Windows

WordPad will be opened on the desktop:

You will see the *WordPad* window:

On the taskbar you will see a

taskbar button

Just like in previous versions of *Windows*, you can use a taskbar button to perform various actions. You will learn more about this later on in this book.

You will see the *WordPad* window with a blank document in it:

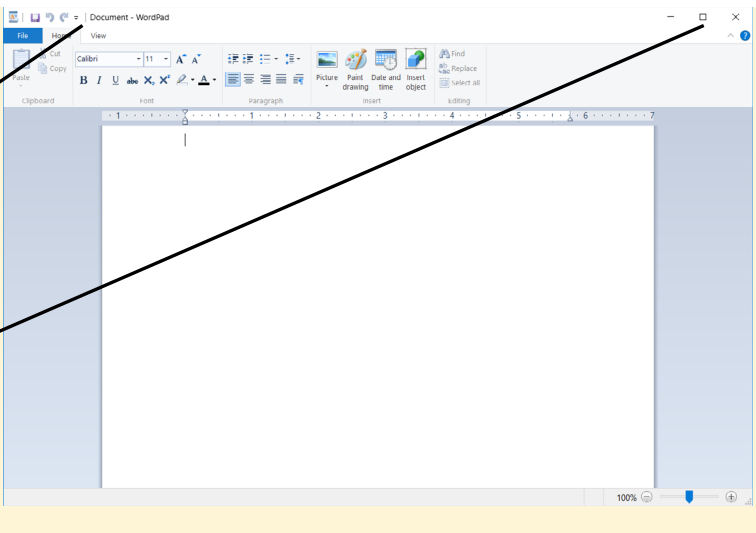

At the top of the window you see the *title bar*:

This bar contains the name of the **WordPad** program.

In the right-hand corner of the window you see three buttons

You can drag the edges and corners of a window. Then the size of the window will change.

The programs and apps that are included in *Windows 10*, all have the same buttons    on the title bar in the upper right corner of the window.
